It's you and science

You're an individual, with your own DNA. That matters on the golf course. It certainly matters on the tee box.

Science and physics have been one of the biggest drivers of improved distance off the tee for the very best players. It has been a huge driver of metalwood design to ensure the maximum distance is available to everyone. Now it's time for you to take advantage of the full potential available to you.

Get your DNA measured

There's a driver DNA – ball speed, launch angle, and spin rate. We need to match those when fitting you for a driver. How close is your match? Do you have 20 metres or more of extra performance in the right DNA? Come and see us.

Let's unlock your potential to thrill.

Spread the love

We have had a year that has reminded us of how important the outdoors, space, and our health is. If you play golf, then you should consider yourself to be a very lucky person. Spread that love to people you care about in 2021.

If you have a non-playing partner, we want to help you introduce them to a healthier, happier life.

A perfect gift for someone

We're starting a fun, social programme to ease people into the game, out onto the golf course, and into a place full of new social connections and enjoyment. Why not gift a place on that programme, to someone special in your life.
