Fitting you for distance

## Don't weight to hit it further

*Find your equilibrium and  
achieve your distance potential!*

Finding a driver shaft with the right weight for your swing is going to make it easier to up your swing speed and hit longer drives.

## Enjoy speedy improvement

An off-the-rack shaft that's too heavy may rob you of valuable clubhead speed and distance. But that doesn't mean you should play with the lightest possible shaft either because there are many other factors that affect club performance.

*The only way for us to know for sure which shaft suits you best is with a fitting. During this session, we'll find a shaft that enables you to swing faster without compromising your body and clubhead positions at impact.*

## Achieve your distance potential

Let's find out if your driver shaft is right for you and whether there's an adjustment we can make to help you hit it further than ever!

# GET CLOSER

Wedge shots around the green are all about getting as close to the hole as possible. A golf ball that spins readily and feels great makes this a lot easier to do consistently. The new Srixon Z-STAR is that ball.
