More than a fitting

It's 10, 20, 30 or more metres

We could tell you that you should have a fitting. But that's not where the conversation should start. If we're talking tee shots, the conversation starts with you:

How far are you hitting your tee shots with your swing speed?

How consistently do you make good contact and get to your longer distances?

How many times do you find the fairway?

From those answers, comes a discussion about ambition and priority. What would make the biggest impact on your game and your enjoyment of the game?

The conversation is still about you, because what we're searching for is the best result for you.

Now we go to work. With your swing, swing speed, and launch data, how do we quickly maximise your results in distance, accuracy, and consistency? What can we do with a perfectly fitted club to change your game from the tee?

The gift we can give you

We want to change your experience out on the golf course, tee-shot after tee-shot. It's what we're trained to do. It's what the technology now makes even easier for us to do. It's never been easier to find the right launch angle and spin rate (with your ball speed) to deliver you the best possible results.

Connections in the holidays

The best thing about Christmas

While many in the northern hemisphere are having to put the clubs away, or pull on the extra layers and thermal gloves, this time of the year offers us the gift of golf.

Use some time in the holiday to get out and play golf with friends or family. Recharge on the golf course. Remember there's not many activities that are better for your well-being than playing a round of golf with friends.

And there's few feelings more joyous than feeling a solid iron approach shot leave the iron face or to sense that you've found the sweet spot with your driver. And how do you feel when you see a golf ball check and stop after you've hit a pitch shot?

Can we help?

How can we help make this the best golfing holiday season for you?
