We want to advise you all that the Club does not tolerate this type of behavior and both men have been banned from returning to Zwartkop. The incident has also been reported to the Gauteng North Golf Union.

Unlock extra distance

It's not only about speed

*More important than swing speed is how that speed
is transferred to the ball.*

Solid contact is all important

Just half an inch off-centre can cost you up to 10-15 metres with your driver. That can be the difference between carrying a fairway bunker and being plugged in one. You're actually better off squaring the club with a lower clubhead speed than mishitting with a higher clubhead speed. We can get you closer to the centre.

New year, new game

Iron out your mishits

Tired of those pulled or pushed iron shots ruining your birdie chances? Want to play more stress-free golf and enjoy more satisfaction on your approach to the green? If you answered “yes”, then the first step is for us to make sure you’re squaring your irons at impact.

[Book an iron assessment](#)

One problem, many solutions

There are many potential reasons for not squaring the clubface at impact. Releasing the club too soon can cause the face to open at impact and push your shot. Pulled shots could be because your grip is a bit too strong, closing the face slightly. Then there’s also the lie angle of your irons to consider. But whatever your fix is, we’ll find it.

*Whatever the club, whatever the fix, we're on the journey to
better golf with you!*

| Your best year ever

Square up and make this your best golfing year ever!
