Remember to repair your pitchmarks!

Left for even the shortest time means it takes a lot longer for the greens – and fairway divots to heal.

Let us help you play better golf...

This week Corne gives you a drill to help improve your ball striking. The drill highlights the importance of having good balance through your swing and will improve your club face rotation into the ball.

Better together

Solving the time challenge

Raising children is one of the most rewarding parts of life. But it does take lots of time and energy, and often, that means less time for golf. But what if your children loved the game as much as you do?

Double the enjoyment you get from the game by getting your child into golf. You could spend hours of quality time with your loved ones, while also keeping your swing in shape.

Once we've set the learning foundation, we move into the 'play to improve' phase of our junior coaching approach. It's usually between the ages of 13 and 15 years that we start to shift the focus towards shot-making and performance.

You can have it all

By getting your child into golf, you'll be able to spend more time at the course while having a new shared passion.

Bring your child

MILLED WHERE IT MATTERS

By only milling the parts of the putter head that have an impact on your putting performance, Cleveland has created a high-performing milled putter without the usual high milled price tag. The new Cleveland HB Soft Milled Putter.
